Cyber Face Tutorial Video by Jo-Naz

Here is a tutorial many of u guys have been asking for. I'm sorry it took me that long to make it but here it is at last. I made the video when I did Jeff Carter's cyber.

Hope it helps and u understand me. My voice is a bit off while making the vid **plus** english is not my number one language **plus** I'm a guy with tube brains, so it's not that easy to explain what I'm doing in foreign language while doing it. So try to understand.

Any way. I really hope this is even a little bit help for those who've asked them.

If u want to use the cyber template I'm using in the tutorial, u can download it from here:

The video is in eight different sized parts. U can watch them here:

[Chapter 1](#): Here are some basic things and thoughts about cyber making

[Chapter 2](#): In this video I add the face of Jeff Carter on the EA's model

[Chapter 3](#): My way to 'spread' the face

[Chapter 4](#): Adding realistic looking and colored eyes to the cyber

[Chapter 5](#): Adjusting the colors and brightness

[Chapter 6](#): Adding some details and real life looks

[Chapter 7](#): How to make a beard using basic PhotoShop brush

[Chapter 8](#): The final touch
